

The Cobalt 2 Dive Computer is the first of a new generation that is easy to use, intuitive and easy to read. The menu-driven interface is self-explanatory and can be mastered in just a few minutes.

The full color display provides high contrast, sharpness and brightness. The display brightness can be set by the user or with an optional automatic brightness control setting.

The internal lithium ion battery can be quickly recharged with the AC charger or slow charged by plugging into the USB port of any PC. It will provide 40-50 hours of dive time between charges and many months of standby power.

The Rapid Response 3D digital compass works at any angle and makes underwater navigation simple. Set a course and go. Unlike most digital compasses, it remains active until you choose to turn it off.

The high pressure quick disconnect allows the Cobalt to be removed and carried separately from your regulator system.

The Cobalt is a multi-gas computer that can be set for any Air/Nitrox mix to 99% O2. Up to 6 mixes can be preset for easy switching, including gas switches underwater.

The dive log and planner are powerful tools that allow the easy interactive planning of almost any dive. The logbook will store up to 600 hours of detailed dive profiles in memory.

The Recreational RGBM Algorithm (Reduced Gradient Bubble Model) was created exclusively for Atomic Aquatics by Dr. Bruce Wienke. The RGBM is designed to cover a wide spectrum of diving activities such as bounce, altitude, decompression, repetitive and multi-day.

The Atomic Aquatics Cobalt 2 is the most intuitive, easy to use and easy to read dive computer available.

Features:

- Brilliant full color LCD display
- Rechargeable battery
- Leakproof magnetic buttons
- Air and Nitrox to 99% O2
- Pre-program up to 6 gas mixes
- Switch gases underwater
- Recreational RGBM algorithm
- Customizable user options
- 3D, fully tilt compensated digital compass
- 600 hour dive memory
- Automatic altitude adjustment
- Quick disconnect slimline high pressure hose included

The **Main Menu** is "home" on the Cobalt 2 Computer. It contains the most commonly used items related to diving or dive planning. Selecting any menu item opens a new screen to access specific functions and settings. Menu navigation is simple and intuitive.

Pressing the "soft touch" rubber buttons of the Cobalt 2 activate leakproof magnetic switches. Press to make a momentary contact and release to make your selection. From any screen, pressing the **BACK** button repeatedly will return you to this menu.

Edit Remove

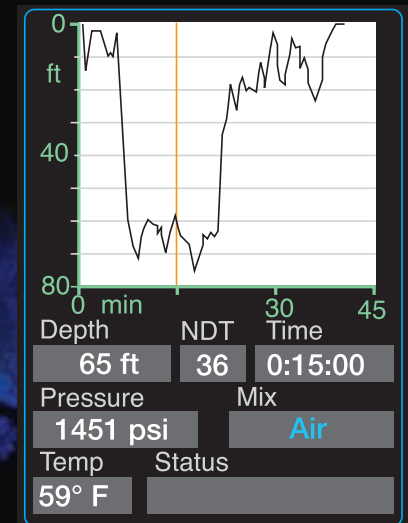

Alerts

SELECT a mix to edit, make primary, or remove. Select ADD to add a new mix.

Gas switching is **EASY**. The **Defined Gas Mixes** screen lists up to six predefined gas mixes and tank sizes. You can quickly select any one of these to be your primary mix.

You can also edit any mix or the tank size associated with it.

It's All in The Details

Just one of many options in the Dive Log is the **Dive Log Profile**. You can step through the dive to view specific details at any point of the dive.
